IN THE CLAIMS

Please amend the claims as follows:

1. (original) A method of enabling to establish a connection between multiple UPnP-compliant resources, wherein each of the resources has a respective ConnectionManager service, and wherein the method comprises configuring the respective ConnectionManager services so as to enable a UPnP Control Point to use the respective services for negotiating the connection between the respective resources to be established at a time determined in advance.

2. (original) The method of claim 1, wherein the resources comprise a tuner for tuning to a broadcast channel and a recorder for recording a broadcast.

3. (original) A method of establishing a connection between multiple UPnP-compliant resources, wherein each of the resources has a respective ConnectionManager service, and wherein the method comprises using the respective ConnectionManager services configured so as to enable a UPnP Control Point to use the respective services for negotiating the connection between the respective resources to be established at a time determined in advance.

4. (original) The method of claim 3, wherein the resources comprise a tuner for tuning to a broadcast channel and a recorder for recording a broadcast.

5. (original) A UPnP compliant device with a ConnectionManager service that is configured so as to enable a UPnP Control Point to use the service for negotiating with another ConnectionManager service a connection with another UPnP-compliant device to be established at a time determined in advance.

6. (original) The device of claim 5 comprising a tuner for tuning to a broadcast channel.

7. (original) The device of claim 5, comprising a recorder for recording content information.

8. (canceled)
